The Wood-Carvers' Association notified the Building Trades Section of the Central Labor Union yesterday that their men are still making a determined stand for eight hours. The bosses have made alluring promises which the Union would not listen to. The Union regards the favorable ending of the strike as a mere matter of time, the "scabe" being incompetent workmen. The Building Trades Section of the Central Labor Union instructed its Organization Committee yeaserday to rake a definite report next Wednesday concerning the amalgamation of the United and Standard Engineers' unions. It was stated that the report that one of the unions would not agree to the conditions of the other on account of its dislike to the C. L. U., was false.
